

Innovation and Technology Intern

Project Title	Innovation and Technology Intern
Project Summary	CIA is dedicated to creating a workplace culture in which thinking, creativity, and innovation are encouraged. We seek an intern to assist in identifying best practices and creating training materials.
Country	United States
Agency	Central Intelligence Agency
DoS Office	N/A
Post	N/A
Section	N/A
Number of Interns	2

Project Description

We seek an intern who can assist in identifying best practices from academia (e.g. cognitive/behavioral science, business/management theory), government, and the private sector so that we may apply this research toward internal programs. As technology and innovation are closely intertwined, we are also looking to grow the digital acumen of our analytic workforce. Our virtual intern will also help to identify best practices and training materials to assist in introducing analysts to more quantitative types of work, basic programming, and data visualizations.

Tasks:

- * Research, draft, and edit timely and accurate fact sheets, brochures, presentations, blog posts, digital videos, graphics, and podcasts related to innovation, creativity, cognition, and mindfulness for an internal CIA audience.

- * Support CIA staff in creating learning materials to promote digital literacy within our analytic workforce. Examples include identifying or creating short videos demonstrating basic programming skills; writing blog posts about how to automate boring tasks; or creating a gallery of visualizations that exemplify data-driven storytelling.

Desired Skills Interests
